Roll No: 97

Subject : Soft Skill

Title: Soft skill and hard skill

Introduction to Soft Skills

Soft skills are personal qualities and social abilities that enable individuals to interact effectively with others and navigate various situations in life and at work. Unlike technical expertise, these skills shape how we communicate, think, behave, and collaborate.

They're essential in **education, career, and personal life**, improving confidence, relationships, and professionalism. Think of them as the foundation for building strong connections and thriving in any environment.

Soft Skills vs Hard Skills

Understanding the distinction between these two types of skills helps you develop a balanced professional profile.

Aspect	Soft Skills	Hard Skills
Definition	Personal and social abilities	Technical and job-specific skills
Nature	Behavioural and emotional	Practical and measurable
Development	Developed through experience	Learned through education/training
Measurement	Difficult to measure	Easy to test and certify
Examples	Communication, teamwork, leadership	Programming, accounting, data analysis

 **Key insight:** Hard skills help you **get a job**, but soft skills help you **grow in the job** and advance your career.

Examples of Each Skill Type

Soft Skills

Communication

Sharing ideas clearly
and listening actively

Teamwork

Working collaboratively
and supporting
colleagues

Leadership

Guiding, motivating,
and inspiring people

Problem Solving

Finding creative
solutions quickly

Hard Skills

Programming

Writing computer code
and building software

Accounting

Managing financial data
and records

Designing

Creating graphics and
web layouts

Data Analysis

Interpreting complex
data sets

The Impact of Soft Skills

Soft skills shape both professional success and personal wellbeing, influencing how we navigate relationships and challenges.

On Career

Interview Success

Impress employers with confident communication and professionalism

Leadership Growth

Build credibility and motivate teams effectively

Better Collaboration

Work harmoniously with diverse colleagues

Promotion Potential

Increase chances of advancement

On Personal Life

Stronger Relationships

Build deeper connections with friends and family

Increased Confidence

Feel more self-assured in social situations

Reduced Conflicts

Resolve disagreements constructively

Positive Character

Develop a reputation for reliability and empathy

Remember: Soft skills determine how well you succeed in life, not just what you know.

Thank You
