OBJECTIVE

Data-driven AI engineer with hands-on experience in **machine learning**, **NLP**, **LLM applications**, and **automated data pipelines**. Skilled in **Python**, **data analysis**, **RAG systems**, and **cloud-based AI workflows**. Built multiple end-to-end AI platforms focused on **structured data extraction**, **prediction models**, and **automation**.

SKILLS AND INTERESTS

Programming Languages : C, C++, Python, JavaScript

Data & ML: Pandas, NumPy, Scikit-learn, PyTorch, EDA, Feature Engineering, Model Evaluation

AI & NLP: Transformers, LLMs, RAG, Hugging Face, LangChain, Gemini API, OpenAI API

Databases: PostgreSQL, MongoDB

Cloud & Tools: Azure (basic), Docker, Git

Soft Skills :Critical thinking, Data-driven decision making, Project ownership

EDUCATION

NETAJI SUBHASH ENGINEERING COLLEGE

Oct 2022 - June 2026

Bachelor of Technology in Computer Science & Engineering (CGPA 8 / 10)

EXPERIENCE

AI ENGINEER | GATE MEDIATECH PVT LTD

Jan 2026 - Present

- Built a multi-agent AI system integrating **PubMed APIs**, **DuckDuckGo search**, and **web scraping**, structuring **5,000+ research records** with **87% NLP classification accuracy**.
- Developed a **vocal biomarker model** using PyTorch and Librosa, achieving **82% risk classification accuracy** on test audio datasets.
- Implemented a **multi-model LLM pipeline** using OpenAI, Claude, Hugging Face, and Gemini for research summarization, validation, and automated content generation, reducing manual analysis time by **~70%**.
- Integrated **AI video generation (Veo)** and automated product content pipelines, reducing production cost by **80%** and improving generation speed by **2.2×**.

PROJECTS

Alzheimer's Disease Prediction using ML

- Worked with a clinical dataset of about 1,000 patient records.
- Cleaned the data, handled missing values, and selected useful features.
- Trained models like Logistic Regression and Random Forest.
- The final model achieved around 84% accuracy in predicting early Alzheimer's risk.

Startup Discovery Platform

- Built an ML-driven pipeline that collects startup programs from **100+ RSS feeds and web sources** and converts unstructured text into structured datasets.
- Used LLM-based extraction and validation to process **2,000+ entries** with **~90% structured data accuracy**, reducing manual research by **80%**.

Clickatron – AI Creative Canvas

- Built an AI image generation pipeline using diffusion models and LLM-based prompt optimization to create thumbnail variations from text inputs.
- Generated **400+ images** during testing and reduced manual design effort by **60%** through automated generation and queued processing.

POSITIONS OF RESPONSIBILITY

Logistics Head – Entrepreneurship Development Cell (ED Cell)

Managed end-to-end logistics for three business and entrepreneurship events, coordinating operations, resources, and cross-team execution.

ACHIEVEMENTS : 2nd place, National Hackathon (Ecometric Project) | 3rd place, Hackolution — IEM Kolkata
